

WEAVER "Ring Drive"

Industrial Silo Reclaimer for Silo Diameters 30-120 Feet

TWELVE KEY FEATURES OF "AUTOMATED" WEAVER INDUSTRIAL SILO RECLAIMERS

1. Automatically and Efficiently Reclaim Hard to Handle Bulk Materials from Silos
2. Continuous, reliable, and automated delivery of Bulk Materials from Silos
3. High storage volumes and high delivery rates up to 600 CF/Hr.
4. First In – First Out for excellent control of Bulk Material Inventory
5. Save valuable plant site area by storing Bulk Materials vertically in Silos
6. Keep Bulk Material blended and homogenized for consistent quality
7. Bulk Materials are safely kept from contamination (mold, insects, birds, rodents)
8. Excellent control of air quality and emissions (dust, etc)
9. Large savings over cost of loaders and labor (plus minimizing safety issues)
10. All normal maintenance of Weaver Silo Reclaimers is done outside the "confined space" of your Silo
11. Weaver offers a wide range of options for "Site Specific" applications
12. Weaver is well qualified with many years of "Hands-On-Field Experience" to customize your plant's needs or requirements

WEAVER Industrial Silo Reclaimer Features

#1. DUAL AREA RECLAIM SYSTEM

Weaver's Exclusive Dual Area Silo Reclaimer System uses a Primary and Secondary Sweep Auger that undercut two separate areas in the bottom of Silos. This unique system provides excellent downward "inter-particle" movement. Weaver's Exclusive Free Flow Control System, using adjustable dome doors, rotary flow control gate and triple pitched sweep auger flighting, controls Free Flow when reclaiming material from the bottom of a Silo. The combined effect of these two features develop more consistent flow patterns in Silos resulting in truer "first in – first out" delivery of quality materials that are more uniformly homogenized and blended. And further, these features will greatly minimize age old Silo Material Bridging problems.

#2. STANDARD INDUSTRIAL COMPONENTS

Weaver has designed their entire family of Weaver Industrial Silo Reclaimers so that Standard Maintenance of all moving parts can be done from OUTSIDE the silo material storage area. In addition, wherever possible, Weaver uses Standard Industrial Components that are commonly available from Industrial Suppliers. Weaver has made this a top priority to help assure your independence and thereby help reduce your maintenance cost. When you purchase a Weaver Industrial Silo Reclaimer, you are not making an exclusive commitment to us for parts or service.

#3. ELECTRIC LOGIC CONTROL

Weaver reclaimers are either supplied with complete electric control logic or control panel. The PLC completely integrates all reclaimer functions for maximum performance. Because "Free Flow" is controlled, the panel has a "stand-by mode" to automatically jog the main auger 1-2 revolutions every 1-12 hours, overnight or during periods of silo filling when not shipping product. The Discharge Hopper can be sized to have enough capacity to accommodate several days of jogging without the need to operate other Discharge Conveyors.

#4. WEAVER FAMILY

Since 1901, the Weaver Family has been involved in the Silo Construction Business. Over the decades, there has been a constant drive to improve their products and silo construction methods. In the early 60's, Weaver developed and built in their own plant a Silo Jump Form System for building Concrete Silos for their Farm and Industrial customers. Weaver Silo Building Machines continue to be today's Industry Standard in the US and Canada. During this period, not pleased with other offerings, Weaver developed, built, and installed Silo Reclaimers in Silos built by Weaver's crews for their Agriculture customers. Following this, Weaver's crews built Industrial Silos and Reclaimers for a wide variety of materials requiring reclaim rates over 600 tons/hr. Today, Weaver's focus is exclusively on building and marketing a complete line of rugged, high powered Industrial Silo Reclaim Systems. Because of Weaver's many years of "hands on-field experience", you can buy from Weaver with Confidence!

WEAVER RECLAIMERS EFFICIENTLY RECLAIM A LARGE RANGE OF BULK MATERIALS UP TO 600 TONS/HR.

1. Soya Bean Meal
 2. Bakery Meal
 3. DDGS
 4. DWG
 5. Meat By-Products
 6. Feather Meal
 7. Protein Meal
 8. Rolled Shelled Corn
 9. Ground Corn Cobs
 10. Organic Fertilizer
 11. Urea
 12. Bulk Chemicals
 13. Gluten Feeds
 14. Wheat Mids and Shorts
 15. Sugar (USDA Accepted)
 16. Ice Cubes (USDA Accepted)
 17. Peanut Shells
 18. Rice Hulls
 19. Mixed Solid Wastes (MSW)
 20. Plastic Tape Scraps
 21. Coal
 22. Iron Ore
 23. Wood Flour
 24. Sawdust
 25. Sander Dust
 26. Wood Chips/Shavings
 27. Ground Wood Pallets
 28. Whole Tree Chips
 29. Hogged Bark
 30. Wood and Feed Pellets
- And other types of Bulk Materials

WEAVER's Silo Reclaim System. Rugged Design. Tough. Reliable.
